

GCSE results 2017

We are thrilled with our examination results. This is the first set of GCSE results for the Academy and our students have a 100% pass rate in all GCSEs and Btecs. This is particularly impressive in the sciences as all IKB students study separate Biology, Chemistry and Physics GCSEs.

All students gained at least one grade at a B or above in their GCSEs and Btecs and 67% of students achieved at least one A grade or above. This is a fantastic achievement for all students but a special mention must go to Tom Jackson who achieved a Grade 9 in Maths, 2 A*s, 1A and 5B grades. Azam Javid who achieved 2 A*s, 2 As and 4Bs. Owen McDermott who achieved 1A*, 5As and 3 Bs and Sam Joy who achieved 4 As and 4 Bs.

Our initial figures give IKB a positive Progress 8 result – the way the government performance tables compare schools– this means students perform better at IKB than other schools and you only get results like this from excellent teaching, motivated students and supportive parents, something we are proud of here at IKB.

There are still places available in the sixth form at IKB so please contact us or drop in to discuss option choices.

A level results

At IKB we are thrilled to receive our first ever set of A Level and Level 3 Btec results – the culmination of and reward for two years of hard work and high quality education from students and teachers.

There is so much to celebrate and we are really pleased that our students have achieved highly in both the academic and vocational qualifications across the full range of STEM (Science, Technology, Engineering and Maths) subject areas.

IKB students achieved a 100% pass rate in all the A level Science subjects and alongside this we also achieved a 100% pass rate in the Level 3 Btec Engineering qualification – where almost 50% of our students gained a double Distinction* (equivalent to two A*grades at A level). In our most practical and creative area of A level Product Design we again achieved a 100% pass rate.

79% of our students gained at least one top grade (A* or A or equivalent) and impressively 58% gained at least two of these top grades.

These results firmly place IKB on the map as a learning institution where excellence in the areas of Science, Technology, Engineering and Maths can be achieved.

Most importantly these results give our students the opportunity to follow their dreams to study at University and on high quality apprenticeships. We have students leaving to study in the fields of aeronautical, motor sport, and design engineering as well as the more traditional subjects such as mechanical engineering and economics. Some of our most successful students have gained places on the most competitive higher and degree apprenticeships in areas of engineering, computing and finance.

This has been our first group of students and we will miss them, but know that the results they have gained at IKB along with their work placement experiences have secured them fantastic university places, apprenticeships and jobs and will equip them well for the next stage of their lives. We wish them all the very best of luck.
